V59.01.03

Release date: September 07, 2022

Applies to the following printer models:

Printer Models	Now	First Build
• ZQ220 Plus • ZQ120 Plus	V59.01.03	V59.01.03
• ZR138CR • ZR138CN • ZR138EM	V59.01.02	V59.01.01

Changes

1. Firmware V59.01.03 is the initial version for new models ZQ220 Plus and ZQ120 Plus.

2. Made English available for the configuration report (2-key report) and to the settings on OLED screen.

3. Added new model names (ZQ220 Plus and ZQ120 Plus) and PID.

4. No longer support the ESC/POS switch from CPCL via SGD commands for Japan SKU.

5. Added ESC/POS encoding method for ZQ220 Plus and ZQ120 Plus.

Frequently Asked Questions

1. Why should I upgrade to V59.01.03?

   Zebra continually revises and adapts our printer operating system to keep it current with the latest technology trends and best practices. Version V59.01.03 contains improvements such as Bluetooth data transmission speed, but also fixes what could otherwise negatively impact your business. We encourage updating to the latest version to take advantage of new features and fixes for ZR138CR/CN/EM printers.

2. How do I get firmware V59.01.03?

   Firmware V59.01.03 can be downloaded from the ZQ220 Plus and ZQ120 Plus product support page by using the links below and entering your printer's model name (such as "ZQ220 Plus" or "ZQ120 Plus"). zebra.com/zq220plus-info or zebra.com/zq120plus-info

3. Can the printer downgrade to an earlier version if V59.01.03 is installed?

   Yes. The printer accepts downgrading to V59.01.02 even when V59.01.03 is installed. It will automatically print a configuration report after a successful installation. Reboot the printer and install the firmware again if installation failed.

Issues Corrected

1. The printer screen occasionally displayed Bluetooth update information and printed a configuration report when powering on ZR138XX printers.

2. The Bluetooth transmission throughput of the ZR138XX printer was slower than V59.01.02 when working under Bluetooth classic mode.

V59.01.02

Release date: November 30, 2021

Applies to the following printer models:

Printer Models	Now	First Build
• ZR138CR • ZR138CN • ZR138EM	V59.01.02	V59.01.01

Changes

1. The ZR138CR/CN/EM firmware is now V59.01.02.

2. Upgraded firmware to be compatible with two types of Bluetooth modules. Made RAM and Flash memory available as new components will be used in later productions due to the global supply chain constraint.

3. Synchronized the Bluetooth firmware upgrade with printer firmware.

Frequently Asked Questions

1. Why should I upgrade to V59.01.02?

   Zebra continually revises and adapts our printer operating system to keep it current with the latest technology trends and best practices. Version V59.01.02 synchronizes the Bluetooth firmware upgrade with printer firmware. We encourage updating to the latest version to take advantage of the new features for the ZR138CR/CN/EM printers.

2. How do I get firmware V59.01.02?

   Firmware V59.01.02 can be downloaded from the ZR138CR/CN/EM product support page by using the link below and entering your printer's model name (such as "ZR138CR", "ZR138CN", "ZR138EM"). zebra.com/us/en/support-downloads/printers-cn/zr138cr-cn-em.html

3. Can the printer downgrade to an earlier version if installed V59.01.02?

   It is not recommended to downgrade to V59.01.01 if V59.01.02 is installed because V59.01.01 is not compatible with the functionality provided by the two types of Bluetooth module and memory.

Issue Corrected

None.

V59.01.01

Release date: May 24, 2021

Applies to the following printer models:

Printer Models
• ZR138CR
• ZR138CN
• ZR138EM

Changes

This is the initial release of this firmware.
