## Firmware Release History

### Firmware: V2.06

**Release Date:** May 5, 2023

**Issues Corrected:**

- None

**Known Issues:**

- None

**Changes:**

- Due to component obsolescence, we have redesigned the motherboard of ZC10L. Printers manufactured in and after March 2023 come with the new firmware (V2.06) installed. This new firmware is backward compatible. For printers manufactured before March 2023, the firmware update is optional. Users can choose to continue using the older version (V2.05) or update to the new version of the firmware (V2.06).
