<b>Notes:</b> * An example of Bundled Products where each item is warranted separately would be a promotional printer bundle that includes a label printer (12 month hardware warranty), a holster (1 month warranty) and a standalone software package (3 month warranty). ** Zebra applies a 12 month warranty to batteries not specifically mentioned in this list. *** Lifetime shall mean five (5) years following the effective date of end of sale (EOS) of the Product as announced by Zebra but in no event later than the Zebra announced end of service effective date for such Product. **** Zebra applies a 12 month warranty to Barcode Supplies provided that the recommended storage conditions are followed. Recommended storage conditions are found on Zebra's material specification sheets. Contact your Zebra Supplies specialist for further information.						

\*\*\*\* Applications Exceptions

Zebra conducts extensive compatibility testing with our printers and media to ensure trouble-free operation. This includes testing of the linerless cutter and linerless tear options. It is important to the use and maintenance of the Zebra linerless printers to use linerless media with an adhesive formulation matched to the material of the platen roller. This will ensure the label will not adhere to the platen and wrap around itself as the motor advances the media.

Warranty Exceptions:

This Limited Warranty does not cover damage resulting from:

- External causes such as accident, abuse, misuse
- Servicing of printers not performed or authorized by Zebra including disassembly of the printer to clean built-up adhesive from third party media
- Use of printers other than in accordance with product instructions
- Failure to follow manufacturer's instructions and failure to perform preventive maintenance
- Use of printer media or supplies not provided by Zebra
- Incorrect storage and handling of Zebra Certified Supplies products. Please refer to product specification sheets for recommended storage conditions and duration.

Printer Performance and Third Party Media:

The use of third party media can cause a reduction in printer performance including:

- Poor print quality
- Jams due to the label wrapping around the platen roller. Use of any instruments to attempt to remove media that becomes wrapped around the printer platen, will cause irreparable damage to the platen
- Jams due to the cutter mechanism accumulating adhesive
- Jams due to the printhead accumulating adhesive

\*\*\*\*\* ZC10L Media Exceptions

Zebra conducts extensive compatibility testing with our printers and media to ensure trouble-free operation. This includes testing of the ZC10L large format printable card. It is important to the use and maintenance of the ZC10L to use printable cards that meet the unique dimensional specifications and are free of debris and burrs that can cause damage to critical components (i.e. printhead) and result in poor print quality.

Warranty Exceptions:

This Limited Warranty does not cover damage resulting from:

- External causes such as accident, abuse, misuse
- Servicing of printers not performed or authorized by Zebra including disassembly of the printer to clean built-up adhesive from third party media
- Use of printers other than in accordance with product instructions
- Failure to follow manufacturer's instructions and failure to perform preventive maintenance
- Use of printer media or supplies not provided by Zebra
- Incorrect storage and handling of Zebra Certified Supplies products. Please refer to product specification sheets for recommended storage conditions and duration.

Printer Performance and Third Party Media:

The use of third party media can cause a reduction in printer performance including:

- Damage to critical components (i.e. printhead)
- Card transport issues
- Print quality issues

Product Warranty Exceptions List
