Applying Patch of MT2000 ADCServices Version 1.0.0.24

This document describes how to apply the patch of ADCService DLL Version 1.0.0.24 to fix Nixdorf A no error beep on transmission timeout and incorrect default timeout value.

Applying the Hotfix:

a. Patch Files

There will be one file in the patch package

(1)   adcservice.dll – ADCService DLL;

b. Applying the Hotfix

(1) ActiveSync the scanner to a PC;
(2) Open up the "Platform" folder on the device using "Explore" on ActiveSync;
(3) Copy the DLL file to "\Platform" folder;
(4) Cold boot the scanner (by press and hold scan trigger and '2' key. Wait for screen going black the 2nd time and release the trigger and key. Or, just remove the battery and reinsert it to cold boot.)
(5) The scanner should boot up with the patch applied.
